Procurement that saves time, *reduces risk, and maximises your budget*

Frameworks aren't just for six-figure tenders. They can, and should, be used for everyday ICT purchases too. Why? Because chasing 3 quotes isn't always the best way to secure value, manage risk, or support your team.

What framework first gives you

Compliance confidence

- Fully aligned with UK Public Contract Regs
- DfE-approved
- Audit-ready documentation trail
- Meets your procurement policies

Financial efficiency

- Pre-vetted suppliers = better pricing
- Remove duplication in admin time
- Real savings (even on smaller purchases)

Operational ease

- Staff aren't wasting hours chasing suppliers
- No scope creep or hidden gaps
- You retain final sign-off on every deal

	Chasing 3 quotes	Framework First
Time	Slow, repetitive	Fast, supported
Price comparison	Often unclear/spec mismatch	Transparent & pre-vetted
Audit Trail	Manual, inconsistent	Fully documented
Risk	Sits with school	Shared and minimised
Support	None	Ongoing expert help

Let's make procurement work smarter
